Wilever Gómez

Senior Flutter & Supabase Developer | Health Tech Team Lead |
Transforming Healthcare Through Technology
Buenos Aires, Buenos Aires Province, Argentina

Summary

I am a passionate technical leader and senior developer specializing in scalable health-tech solutions with Flutter and Supabase. With over 6 years of experience, I've dedicated my career to creating digital platforms that transform healthcare delivery and genuinely improve people's lives.

CURRENT ROLE

Leading the technical development of a healthcare platform serving over 1 million active users across Argentina, managing cross-functional teams of analysts, developers, and QA engineers, while defining architectures that balance innovation, scalability, and strict healthcare compliance (Patient and Doctor data protection).

KEY ACHIEVEMENTS

- Designed comprehensive Row Level Security policies protecting sensitive patient data
- Integrated AI-powered features for medical data analysis, improving clinical workflows
- Led architectural migration from monolithic to modular design (+45% team velocity)
- Successfully scaled infrastructure to support 1M+ active users

INTERNATIONAL EXPERIENCE

Throughout my freelance career, I've led projects across multiple continents:

- United States: Wellness app with 50,000+ active users
- Panama: Health platform restructuring and market expansion
- Peru: Educational app maintenance and enhancement
- Europe & LATAM: Technical consultancy across sports, e-commerce, payments, HR, and social platforms

HEALTHCARE TRANSFORMATION

During my three years leading the technical innovation team at Unión Personal, I spearheaded the digital transformation that migrated over 90% of in-person healthcare services to digital platforms during the pandemic, ensuring continuity for 700,000+ members during Argentina's most critical health crisis.

TECHNICAL EXPERTISE

Backend & Database: Supabase, PostgreSQL, Edge Functions, RLS, Real-time subscriptions, Database migrations

Mobile & Frontend: Flutter, FlutterFlow, Offline-first architecture, Cross-platform (iOS/Android)

DevOps: GitHub Actions, CI/CD pipelines, Automated deployments, Database version control

Methodologies: Agile/Scrum, TDD, Clean Architecture, SOLID principles

MY PHILOSOPHY

I believe in effective communication, continuous learning, and the power of collaborative work across disciplines. Every architecture I design and every team I lead is guided by one fundamental question:

"How can we use technology to genuinely improve people's lives?"

Open to: Technical consulting, speaking engagements, collaboration opportunities

Experience

Health tech

Health tech lead (Web/App)

December 2024 - Present (1 year 5 months)

Leading technical transformation of an established healthcare platform serving 1M+ active users. Transitioned team from high Tech Lead dependency to autonomous collaborative model, while modernizing architecture and implementing AI-powered features.

Leadership Transformation:

- Restructured cross-functional team (analysts, developers, QA) from centralized to autonomous model

- Implemented GitFlow workflow reducing deployment bottlenecks by 70%
- Established code review practices and quality gates
- Coordinated alignment between technical, business, and product teams

Architecture Modernization:

- Led migration from monolithic to modular architecture (+45% team velocity)
- Architected AI-powered medical data search using embeddings
- Integrated AI completions for automated clinical document generation
- Designed modular schemas enabling conflict-free parallel development

Technical Excellence:

- Redesigned CI/CD pipeline (GitHub Actions) reducing deployment time by 70%
- Implemented comprehensive RLS policies protecting sensitive patient data
- Optimized database queries, triggers, and cronjobs for real-time operations
- Ensured healthcare compliance throughout transformation

Impact:

- ✓ 1M+ users, zero downtime during transformation
- ✓ Team autonomy: 20% → 85%
- ✓ 80% reduction in merge conflicts
- ✓ 100% healthcare compliance maintained

Technologies: Flutter, Supabase (PostgreSQL, RLS, Edge Functions), GitHub Actions, AI/ML (Embeddings, Completions), Firebase

Profesional independiente

Senior Web/App Developer

October 2023 - December 2024 (1 year 3 months)

Specialized in Flutter, FlutterFlow, and Supabase solutions for international clients across US, LATAM, and Europe, focusing on health-tech, education, and complex data migrations.

Major Projects:

US Wellness App (50K+ users):

- Complete migration from BuildFire to Flutter + Supabase
- Built offline-first architecture with zero downtime migration
- Integrated Stripe payments and Firebase push notifications
- 60% performance improvement, 40% cost reduction

Panama Health Platform:

- Led complete technological restructuring for scalability
- Implemented Flutter + Supabase for cross-platform consistency
- 50% reduction in load times, enabled 3x growth capacity

Peru Education App:

- Automated exam upload process (80% time reduction)
- Enhanced user experience and performance optimization
- 99%+ uptime during peak periods

International Consultancy:

Provided technical expertise to teams across Europe and Latin America on:

- E-commerce integrations • Payment systems • HR platforms
- Sports applications • Social networks

Technical Stack:

Flutter, FlutterFlow, Supabase, Firebase, Stripe, Data Migration, Offline-first Architecture, Cross-platform Development

Combined Impact:

- ✓ 50K+ users migrated successfully
- ✓ Multiple platforms optimized for scale
- ✓ International client satisfaction across 3 continents

Obra Social Union personal

4 years 9 months

Coordinador de equipo técnico de Innovación Unión Personal

June 2020 - September 2023 (3 years 4 months)

Argentina

Led the technical innovation team at Unión Personal, managing web and mobile platforms serving 700,000+ members across Argentina during a critical period of digital transformation.

Leadership & Team Management:

- Managed cross-functional team of internal and external analysts and developers
- Coordinated maintenance and continuous improvement of healthcare platforms
- Acted as technical liaison between departments and internal clients

- Mentored team members on best practices and modern development approaches

Digital Transformation (Pandemic Response):

- Spearheaded digital transformation during COVID-19 pandemic
- Successfully migrated 90% of in-person healthcare services to digital platforms
- Ensured uninterrupted service for 700K+ members during Argentina's health crisis
- Designed and implemented solutions maintaining operational continuity

Technical Leadership:

- Identified business needs and proposed innovative technical solutions
- Optimized processes improving user experience and organizational efficiency
- Implemented modern development practices and quality standards
- Led architecture decisions for scalable healthcare platforms

Impact:

- ✓ 700,000+ members served continuously
- ✓ 90% in-person services digitalized
- ✓ Zero service interruption during pandemic
- ✓ Significant improvement in user experience metrics

Technologies: PHP, HTML, CSS, JavaScript, MySQL, Trello, App Store/Google Play deployment

Skills: Database Design · Backend Development · Cross-platform Development · Leadership Development · Team Coordination · Staff Training · Team Leadership · Analytics · Software Architecture · Technical Leadership · Agile Methodologies · Team Management · Product Management · Product Development · PostgreSQL

Desarrollador Semi Senior Full Stack en Unión Personal
January 2019 - June 2020 (1 year 6 months)

Argentina

Full stack developer responsible for maintaining and enhancing web applications serving 700,000+ users across three medical centers and two self-service platforms: Unión Personal and Accord Salud.

Development & Maintenance:

- Preventive and corrective maintenance of critical healthcare web applications
- Developed and enhanced functionalities improving user experience for 700K + users
- Implemented new features based on stakeholder requirements
- Ensured platform stability and high availability

System Integration:

- Integrated critical healthcare systems:
- HMS (health data management)
- DataTech (laboratory data)
- Thinksoft (appointment scheduling)
- ERP systems (financial data)
- Enhanced interconnectivity and organizational efficiency
- Streamlined data flow between multiple healthcare platforms

Quality & Performance:

- Reduced critical errors by 30%, significantly improving platform stability
- Improved system availability and reliability
- Optimized queries and database performance
- Implemented error monitoring and logging systems

✓ Impact:

- ✓ 700,000+ users benefited from enhanced functionality
- ✓ 30% reduction in critical errors
- ✓ Improved platform stability and availability
- ✓ Seamless integration across multiple healthcare systems

Technologies: PHP, MySQL, HTML, CSS, JavaScript, jQuery

Skills: Database Design · Backend Development · Requirements Analysis · Software Architecture · Web Application Development · Agile Methodologies · Product Development · Back-End Web Development · Software Development · Error Analysis · PostgreSQL · Web Development

Karanta

Backend Developer Junior

April 2017 - June 2018 (1 year 3 months)

Venezuela

Started my professional journey in backend development, focusing on microservices architecture using Java Spring Framework and applying agile methodologies.

Backend Development:

- Developed and maintained microservices using Java Spring Framework
- Applied agile methodologies (Scrum) and coding best practices
- Implemented RESTful APIs and database integrations
- Participated in code reviews and technical discussions

Documentation & Process:

- Authored comprehensive technical documentation
- Created development guides to standardize team processes
- Promoted collaborative work through knowledge sharing
- Documented architecture decisions and implementation patterns

Business Collaboration:

- Collaborated closely with business experts and stakeholders
- Gathered and analyzed functional and non-functional requirements
- Translated business needs into technical specifications
- Participated in project planning and estimation sessions

Technical Foundation:

- Java Spring Framework for enterprise applications
- Hibernate ORM for database persistence
- PostgreSQL database design and optimization
- GitLab CI/CD for continuous integration and deployment

Learning & Growth:

- ✓ Solid foundation in backend development
- ✓ Understanding of microservices architecture
- ✓ Agile methodology experience (Scrum)
- ✓ Business requirements analysis skills
- ✓ Technical documentation expertise

Technologies: Java, Spring Framework, Hibernate, PostgreSQL, GitLab CI/CD

Skills: Database Design · Backend Development · Requirements Analysis
· Architectural Design · Business Strategy · Software Architecture · Agile

Methodologies · Back-End Web Development · Business Requirements ·
Software Design · PostgreSQL

Education

Universidad de Oriente (VE)

Electrical Engineer, Power Systems & Automation

Technologies · (2011 - 2017)
